## Sanar International Hospitals

Sanar International Hospitals is a 150-bedded multispecialty hospital based in the National Capital Region of Delhi in India. Founded in the year 2018, the Hospital offers comprehensive, advanced surgical care in specialities such as Cancer, Heart, Blood and Marrow Transplant, Kidney & Liver Transplant, Bone & Joint and Neurosciences.

With a team of experienced medical experts, state-of-the-art facilities and world-class infrastructure, the hospital has made a mark for itself not only amongst the domestic patients, but also the international patients coming to India for quality medical care.

Sanar International Hospitals has a comprehensive Transplant Programme comprising of Blood and Marrow Transplant, Kidney and Liver Transplants. Started in a modest way, Sanar International Hospitals' Transplant Programme has expanded significantly within a short period since it was started.

## Transplant Programme

Sanar's team of experts comprising of surgeons, physicians and medical staff consistently work towards providing the best quality transplant care. In addition, our surgeons have pioneered methods to improve organ donor health and avoid post-transplant complications. The transplant teams have now been made stronger to provide transplant services to more patients, domestic and international.

## Blood & Marrow Transplant

The Department of Blood & Marrow Transplant provides high-quality, specialised care to patients affected with life-threatening blood disorders. Today, the Unit receives transplant patients not only from India but from the different parts of the world as well. The Unit is equipped with ultra-modern infrastructure, internationally trained clinical experts and supported by state-of-the-art laboratory & transfusion services. The transplant team is recognised internationally for its expertise in comprehensive speciality treatment for people with blood and bone marrow diseases.

## A wide variety of blood disorders and blood cancers are diagnosed and treated at the Unit:

Anaemia, Marrow Failure Syndromes, Coagulation Disorders, Acute and Chronic Leukaemia, Myelomas, Lymphomas and Myeloproliferative & Lymphoproliferative Disorders, Hodgkin's and Non-Hodgkin's Lymphoma, Multiple Myeloma, including Amyloidosis, Myelodysplastic and Myeloproliferative Syndromes (including Myelofibrosis), Aplastic Anaemia and Sickle Cell disease.

## Services available for Autologous and Allogeneic Transplant:

- ▶ Autologous (self-donated) Transplants
- ▶ Allogeneic (donor) Transplants using Matched Related Donors
- ▶ Allogeneic Transplants using Unrelated Donors
- ▶ Allogeneic Transplants using Haploidentical (half-matched) Donors
- ▶ Allogeneic Transplants using Umbilical Cord Blood
- ▶ Myeloablative Conditioning Allogeneic Transplants
- ▶ Reduced-intensity Conditioning Allogeneic Transplants

## Kidney Transplant Programme

Sanar International Hospitals offers a robust Renal Transplant Programme with a multidisciplinary approach involving synergistic efforts of Kidney Transplant Surgeons. The renowned team of experts ensures personalised and comprehensive care- before, during and after transplant surgery.

The hospital is equipped with dedicated transplant ICUs. The unit performs Kidney Transplant procedures as per government guidelines. The expert team of surgeons perform Laparoscopic & Robotic Surgeries skilfully while ensuring the patient suffers minimal pain and benefits from early recovery.
